George:

In a telephone conversation with EFM on May 21 he told me he was making a total of twelve "B" Configuration hatches. Our conversation of May 8 was in terms of 20 B Configuration hatches. We are proceeding with the manufacture of windows for a total of 20 "B" Configuration hatches plus three sets of spare windows.

If this quantity has been reduced, please let me know so that I can cut back on our order. We are in the process of securing raw glass for this quantity so that there is no big rush in making any decision on your part. However, please do not delay beyond the middle of this month.

If I do not hear from you I shall assume we are to proceed with a quantity of windows for 20 "B" Configuration hatches.
